**A Final Decision on *Dobbs* Could Help Re-Humanize Children  
Discarded By *Roe***

In response to the reported leak of the draft opinion in *Dobbs vs Jackson Women's Health Organization*, Feminists Choosing Life of New York (FCLNY), a human rights coalition opposed to publicly sanctioned lethal violence including war, capital punishment and abortion, issues the following commentary:

- \* If the leaked draft becomes the final opinion of the United States Supreme Court we are overwhelmed with gratitude. A nation without a U.S. Constitutional right to kill the most dependent and vulnerable among us represents a giant step forward towards re-humanizing humanity.
- \* *Roe vs Wade* allows for the wholesale slaughter of millions of tiny children, who may have been dependent on women's bodies, but from conception always existed as distinct, unique human beings.
- \* Unlike many states, an overturned *Roe* will have little impact on NY, except to likely elevate the number of children killed in NY abortion clinics. Already NY has the highest rate of abortion of any state in the nation.
- \* Its time all feminists, every justice driven person, more tangibly and productively draw alongside women and girls potentially facing unplanned pregnancies as well as those that do, particularly the underserved and poor.
- \* Now more than ever--post *Roe* women and girls need assurances they can fulfill their professional and personal potentials without destroying their offspring. In 'liberal' states like NY babies' lives are still counting on it.
